PROFESSIONAL EXPERIENCE

Software Developer Internship

TIIDELAB.COM — August(2020) - Till date

I currently work with a team building a digital marketing tool to reduce the problem of complexity and issues associated with poor branding among some start-up firms.

With this our project we will provide start-up business owners supports needed to make their brand stand out in any social media they choose to advertise their products. We just finished the static pages. Did the Media Queries and cross-browser compatibility test.

I did the Contact us page and the Sign-in Page.

What stood out for me was the ability to make changes without losing the main data version control (Git) and Pulling, pushing, and merging our updates using the team Collaboration tool(GitHub)

Digital Product Sales Officer(E-Champion)

STERLING BANK PLC — Sept 2019 - Aug 2020

Sold and guided our customers on how to use all our digital products ranging from conventional banking products apps and websites to Risk and Investment Apps and websites.

I tracked our POS terminal Merchants IDs using POS software to know their daily and weekly turnover which helped me know when to call them and fix their POS issues hwen ever it is faulty.

I won Monthly awards as the best E-Champion on the whole of Lagos Victoria and Beyond.

Administrative Officer(National youth Service Corp)

ETI-OSA III LGA LEKKI PHASE II — October 2018 - July 2019

We as a team, maintained both the digital and physical database of all corp members in my LGA. We Coordinated all the activities the corp members did in my LGA during my service year.
